OUR SERVICE
A PLUS FOR YOU!

KNOW-HOW DIRECT FROM THE ENERGY SUPPLIER

HOPPECKE company headquarters in Brilon, Germany

Innovative energy and system solutions

Active research and development, plus innovative, efficient and economical energy and system solutions: these have made HOPPECKE a renowned energy supplier over the 80 years of its history. And moreover it is an independent family concern, trusted by customers and partners worldwide.

HOPPECKE Group Service company set up in 2007

What count for us are top quality and maximum reliability of our products – and of course our service too! As servicing experts, here too we leave nothing to chance. With the establishment of a separate HOPPECKE Service company in 2007 we underlined in an impressive way the great importance which our company has long placed on service. With this concept we offer a complete service for a wide range of products and for many types of industrial battery.

MOTIVE POWER AND BACK UP

Service to guard against bottlenecks and failures

Batteries and chargers are not only important capital goods – they are also the motor of your logistical processes. And, as the last link in the chain, they back up data in the event of a mains power failure, also protecting and even saving lives! For a permanent guarantee of the functional capacity of your batteries and chargers to provide you with operational reliability and energy availability, regular and professional service is an absolute must. The HOPPECKE Battery and Charger Service Team will carry out this responsible task for you. So that you can concentrate 100% on your core business.

The HOPPECKE Service for batteries and chargers

- Know-how direct from the manufacturer: HOPPECKE-owned service company giving uniform quality and complete European coverage
- Everything from a single source: competence in lead-acid, nickel technology and nickel-metal hydride products, and for all types of industrial batteries
- Maximum flexibility: service packages for varying operating requirements and budgets
- Competence over a broad spectrum: servicing of monitoring and battery management systems
- Black on white: documentation of each energy system for optimisation geared to demand
- Statutory testing: partner for all safety testing on batteries and chargers
- Certified work:
repair of HOPPECKE explosion-proof batteries
- Guaranteed quality:
qualified and professional service personnel
- Round the clock availability:
24 hours a day, 7 days a week

OUR SERVICE PLUS FOR FULL MOTIVE POWER

Cut costs

We top up your batteries at optimum intervals so that they are always filled to the ideal level.

Avoid losses of capacity

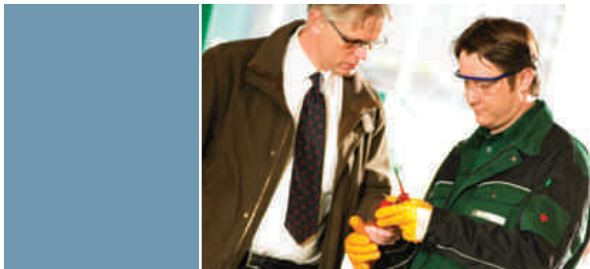

Depending on their use, we clean your batteries as required. As a result, you have full capacity at all times, since there are no earth leakage due to dirty cell surfaces.

Reliable forward budgeting

Our thorough and reliable testing of your batteries and chargers makes it easier for you to budget for the future.

Proof of safety

We check the safety of your batteries and chargers and provide you with informative and recognised certification.

Quickly on the spot in case of need

We are available to you 24 hours a day, 7 days a week. And if there is an emergency, our service team will be with you as soon as possible.

Optimise life expectancy

We make a comprehensive analysis of the utilisation of your energy systems, thereby optimising the life of your batteries and chargers.

Minimise damage

We train your employees directly on site in the optimal handling of batteries and chargers.
