Model 27-02-25

Model 27-02-60

DESCRIPTION

Model 27 Battery Filling Devices Series is characterized by being a professional mobile machine with a large capacity for HOPPECKE customers with more than 5 batteries or trucks.

Model 27-02-25 and 27-02-60 are designed for single-cell filling with a Hoppecke unique filling pistol and come with a 25-litre or 60-litre canister (depending on the model's 2-end digits). The built-in battery has a capacity of 18Ah which gives a device operating time of up to eighteen hours, more than enough for regular maintenance of the batteries. Both models have got also an on-board charger that can charge and maintain the good condition of an 18Ah battery during operation break. Devices can be supplied with 230V or 115V AC connections for on-board chargers.

The pump can carry a minimum of four liters of water per minute with a maximum pressure of 1 bar. The low pressure means that it can operate on most industrial batteries.

**DO NOT USE
THIS DEVICE FOR
BATTERY ACID
FILLING!**

FUNCTIONS

- Simple and easy operation
- Designed for most of the plug manufacturers
- Unique filling pistol
- Built-in battery and charger
- Good manoeuvrability
