

Model 27-02-60

## DATA SHEET

### trak | cellfiller

Product group - trak | battery filling devices

## DESCRIPTION

Models 27 of trak | battery filling devices series are characterized by being professional mobile tools with a large capacity for customers with more than 5 batteries or trucks.

Model 27-02-60 is designed for single-cell filling with a unique, 14mm nozzle, filling pistol and comes with a 60-litre canister. The built-in battery has a capacity of 18Ah which gives a device operating time of up to eighteen hours, more than enough for regular maintenance of the batteries. Model 27-02-60 has also got an on-board charger that can charge and maintain the good condition of an 18Ah battery during operation break.

The pump can carry a minimum of four liters of water per minute with a maximum pressure of 1 bar. The low pressure means that it can operate on most industrial batteries.

Model 27-02 BFD series can also be adjusted for special requirements and be equipped with a 25-litre smaller canister and different pistol types on special request.

**DO NOT USE  
THIS MODEL FOR  
BATTERY ACID  
FILLING!**
