

Model 25-41

DATA SHEET

trak | extractor

Product group - trak | battery filling devices

DESCRIPTION

Models 25 of trak | battery filling devices series are characterized by high operational stability and simple operation. The suction handle is designed to be suitable for a 6mm PVC pipe. Such pipes usually fit between the battery cells of most battery manufacturers.

Supplied diaphragm pump that is self-priming with a pre-filter that is easy to clean.

Model 25-41 is stationary and designed for a constant 230V AC connection without a battery inside. The device can be mounted on the wall and can be carried with a handle.

FUNCTIONS

- Simple operation
- Prepared for most battery manufacturers
- Easy pre-filter cleaning
- Intended for motive battery maintenance
